# OS within the curriculum

# Teaching about formr

1. What is formr?
2. Introduction to the software's structure and components
3. Learning by doing: Implement an own study

# What is formr?

- Open source survey software: Using R and other languages
- Modular design
- Can be used to create complex online studies:
  - Diary studies
  - Peer/partner rating studies
  - Ego-centered social networks
  - Simple surveys
  - ...

# What is formr?

## Live Feedback

generates live and interactive feedback, including `ggplot2`, interactive `ggvis` and `htmlwidgets`. In our studies, this increases interest and retention. [See examples](#).

## Reminders, invitations

sends automated reminders via email or text message, you can generate custom text and feedback here too

## Responsive Layout

all platforms and device sizes are supported (about 30-40% of participants fill out our surveys on a mobile device)

## Share & Remix

easily share, swap and remix surveys (they're just spreadsheets) and runs (they're just JSON). Track version changes in these files with e.g. the [OSF](#).

## Use R

use R to do anything it can do (plot a graph or even use a sentiment analysis of a participant's Twitter feed to decide which questions to ask)

## Secure and open source

Participants can only connect via an SSL-encrypted connection. [Learn more about security on formr](#).

# Structure and Components

## Surveys

- Create items from a spreadsheet

## Runs

- Create and control the study elements

## R package

- Work with formr data

Hello!  
This is a simple survey. Enjoy!

Pick your favorite ice cream.

Vanilla	Strawberry	Chocolate	Everything
---------	------------	-----------	------------

How much do you love ice cream?

Not at all. 

1	2	3	4	5
---	---	---	---	---

 Can't get enough.

In a week, how often do you eat ice cream?

9

Please select the color you like most.

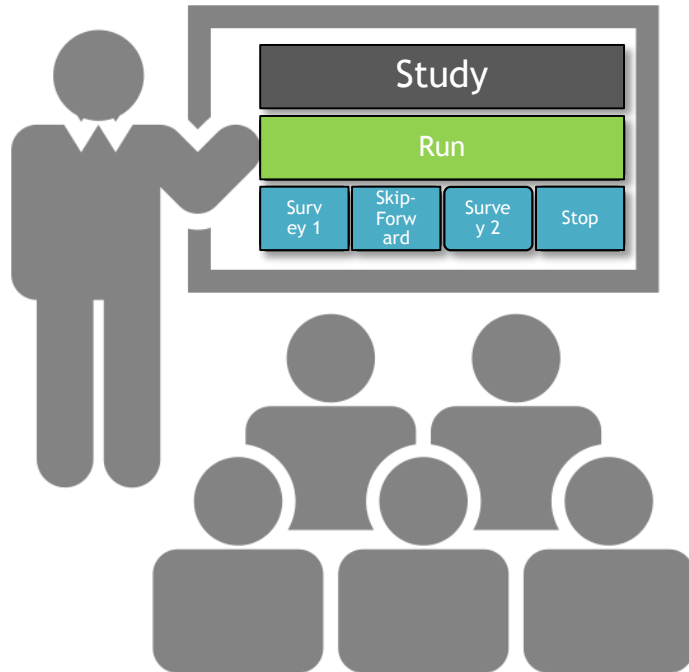

Rainbow

Here you can tell us more about your relationship to ice cream.

I started eating ice cream right after birth

End survey.

# Learning by doing

1. Each student gets a formr account
2. Everyone receives a template for a survey spreadsheet and the task to add items
3. Each student creates a run (=“study”) that contains the survey
4. After (internal) data collection, the whole group has a look on how users can be managed and how results are stored in formr

# Want to try on your own?

- Get an account:
  - Sign up at <https://formr.org/register>
  - Write an email to the formr administrators to gain the right to create studies
- Read the documentation (<https://formr.org/documentation>)
- Explore different item types by cloning and uploading this spreadsheet provided by the administrators: [all widgets](#)
